## Why did SHOT change to a 70-based scoring system?

SHOT aims to be user friendly for both the membership and equine professionals who conduct our clinics and judge our shows. The industry standard for nearly all show associations is a 70 scoring system. Because of this standard, judges are most comfortable scoring horses according to that system. In their mind's eye, they know what a +1/2, +1, or -1/2, etc. looks like.

However, with the 1-10 scoring system, judges had to develop their own idea for what a 5, 6 or 7 looked like. Judges said it was a challenge to remain consistent throughout the day because they were not accustomed to the system. Also, without an industry standard of what a "7" looked like, a rider performing spins might earn a 7 at one show, and then a 5 at another show for the same quality maneuver. This led to judging inconsistencies that make it hard for an exhibitor to know if they are improving from show to show.

Although SHOT has grown exponentially since its inception, our focus of education and helping people ride a better horse has not changed. As SHOT strives to give our membership the best assessment of their progress, consistency in scoring was determined to be key in this educational process. To that end and based on feedback from judges, clinicians, and general membership, the board of directors agreed that adopting a 70-based scoring system would be a great step in the right direction.

If you have any questions about your scores, please ask. There are several directors and exhibitors who would be happy to explain any questions you may have.
