

## DERBY / LTD DERBY TRAIL

Since Cowboy Bob was sleeping on the job this weekend, the boss fired him, and you need to ride across the ranch to see what might be amuck...make sure you have a rope handy.

1. Right hand push gate. Trot through serpentine as shown. At least the fence looks okay so far...
2. Trot between the bridges and bushes, across the 4 logs. Looks like these water gaps need cleaning.... You can do that this winter when you don't have to worry about uncovering a snake!
3. Lope left lead over the logs, curving toward the middle of the arena. This section is definitely overgrazed! It looks like bare dirt! Bob had too many cattle out here.
4. Change leads (flying or simple) and lope across the logs in the right lead, and head toward the steer. Looks like a sick yearling ahead that needs doctoring...
5. Stop and heel the steer. (You get one attempt....if you miss the first loop, the steer will be gone so you won't get a second chance!)
6. Secure your rope. Walk to the drag. It looks like Cowboy Bob just walked away and left all his stuff in the pasture.. Drag his roping dummy around the teepee, around the windmill and bush as shown, returning the roping dummy as you found it.
7. The day is getting short...better wrap up your inspection. Extended trot into the chute. Back the H as shown.
8. Turn and sidepass left into the H. The boss is calling... he said the records in the office are a mess too. You better go put your horse up and see what else needs fixin'.
9. Walk over both bridges. When you walk between the bushes, the pattern is complete.
